"The Standard of Measurement"

About Us

Total Control Systems is a leading manufacturer of piston and rotary positive displacement flow meters located in Fort Wayne, Indiana. All meters are designed with the highest quality to provide superior performance in custody-transfer measurement of diesel exhaust fluid, refined fuels, LPG, fertilizers, chemicals, alcohols, and solvents. Marketed to provide application-driven flow meter solutions for vehicles, dispensers, and fixed-site installations, we provide a full line of accessory equipment including strainers, air and vapor eliminators, control valves, pulse transmitters, and mechanical or electronic registration to complete system requirements. Meters are designed and created using sound engineering principles and state-of-theart computer numerically controlled (CNC) machines in a world-class manufacturing facility. Each flow meter is completely assembled and tested by highly skilled members of our production team, who strive for excellence in workmanship and quality. Our reputation for providing innovative, high-quality, and reliable fluid measurement products is coupled with our sense of customer-driven services. Our first priority is to help our customers achieve increased productivity and provide value to your business today and tomorrow.

APPLICATIONS

Delivery vehicles

Dispensers

Intermediate bulk containers (IBC)

FEATURES

10-year warranty

Reciprocating 3-piston design

Flow range 0.2-50 gpm (0.76-190 lpm)

Superior accuracy

Low maintenance

Long service life

75 years of proven performance

CONSTRUCTION

Housing & Internals:

Stainless Steel

Seals:

EPDM

ACCURACY 1

250:1 = +/- 0.10%

REPEATABILITY 1

0.01% of rated flow

 Accuracy tested at constant operating conditions with 682 Series meter and mechanical registra tion using De-Ionized water as test fluid.

682 Series Piston Flow Meters

The 682 Series piston flow meter is a true positive displacement flow meter that has an inline design consisting of three (3) reciprocating pistons operating within their respective measuring chambers. The pistons are fitted to a wobble plate, which has a shaft extending from its upper surface and a valve pivot attached beneath it. The valve pivot drives a sliding valve from piston to piston as a known amount of product flows through each cylinder bore, controlling the sequence of events in a smooth mechanical motion. The 682 piston flow meter combines outstanding accuracy (+/- 0.1%) with an exceptional turndown ratio of 250:1 (flow range from 0.2 to 50 gpm).

Accessories

The 682 Series meter is available with a full complement of accessories including air eliminators, strainers, and valves, as well as mechanical and electronic registers with temperature volume compensation (TVC), and printers from industry leading suppliers.

Testing and Approvals

Meters are Weights & Measures approved for custody transfer and are flow-tested for accuracy before leaving the factory. Manufactured to meet the high purity ISO 2224-1 requirements for safe handling of Diesel Exhaust Fluid.

Meter Model No.	Flange Size NPT +*	Max. Capacity#		Working Pressure		Working Temperature	
		gpm	lpm	psi	bar	°F	°C
682-15	1-1/2"	0.2 to 50	0.76 to 190	150	10.5	-40 to 160	-40 to 71

- + NPT flange is standard. BSPT, Slip Weld, ANSI and others available upon request.
- * Optional flange sizes available upon request.

700 Series Flow Meters

The 700 Series Diesel Exhaust Fluid Rotary Positive Displacement Flow Meters reflect a tri-rotor design with no metal-to-metal contact between rotors and housing to minimize internal wear, maintain high accuracy over time, and to extend the time between meter calibrations.

Accessories

The 700 Series meters are available with a full complement of accessories including air eliminators, strainers, and valves, as well as mechanical and electronic registers with temperature volume compensation (TVC), and printers from industry leading suppliers.

Testing and Approvals

Meters are Weights & Measures approved for custody transfer and are flow-tested for accuracy before leaving the factory. Manufactured to meet the high purity ISO 2224-1 requirements for safe handling of Diesel Exhaust Fluid.

Total Control Systems is a leading manufacturer of precision measurement systems. Our world-class positive displacement flow meters are among the most accurate available in any industry and are backed by excellent customer service, support, and prompt deliveries.

TCS meters are designed and manufactured to meet or exceed your needs. Our meters are used world-wide in a multitude of applications including Agriculture, Aviation, Diesel Exhaust Fluid, Marine, LPG, Refined Fuels, Industrial Chemicals, and Alternative Fuels.

Discover why Total Control Systems should be the future of your metering solutions!
